

Simple. Sustainable. Standout landscapes!

Nature's Source 10-4-4 is the solution for commercial landscapers who care about the planet as well as quality plants. It's all you need to maintain beautiful, robust landscapes, trees, shrubs and flower beds.

Cost effective.

Concentrated liquid Nature's Source offers an economical alternative to traditional chemical fertilizers. And it works wonders on a wide range of plants.

Sustainable.

Contains oilseed extract, a renewable source of plant nutrition.

Nutritional value

In addition to N-P-K, Nature's Source contains micronutrients along with calcium and magnesium, to help plants thrive – even in high-traffic and high-stress areas.

Convenient.

Nature's Source can be pulled straight from the container with compatible fertigation systems. It mixes easily with cold water and can be used with landscape tank-direct feed applicators. And it can be used as a foliar feed as well as a root feed.

Hard working.

Nature's Source supports beneficial microbial growth in the soil.

Safe.

Nature's Source is safe around people and pets when used as directed. It's safer for plants – lower in salts than most commonly used water soluble fertilizers. It's non-staining, too.

TAKE IT FROM A GROWER

"We started growing our crops with Nature's Source Plant Food 12 years ago and that is why I recommend Nature's Source 10-4-4 to our landscape contractors. I recommend Nature's Source to everyone!"*

Ted Vowels, Country Corner Greenhouse,
Shepardsville, Kentucky

A LANDSCAPE PRO SAYS

"I first used Nature's Source Plant Food on my pansy and viola beds in the landscape 13 years ago. I was very impressed with the results: compact growth, darker green foliage and more blooms. I have been using Nature's Source ever since on my fall and spring flower beds with the same great results."*

Rick Johnson, Landscape Superintendent,
Country Club of Landfall, Wilmington, North Carolina
